DETAILED ACTION

Allowable Subject Matter

1. Claims 1-7 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to clearly teach or fairly suggest a wireless communication device operable as a slave that is connected to a master to perform wireless communication comprising a transceiver for transmitting and receiving data from said master, inter alia, temporarily stopping the operation of the transceiver for a sleep period which is determined according to the number of other slaves connected to the master, as substantially described and connected to independent claim 1. Furthermore, The prior art of record fails to clearly teach or fairly suggest the a controlling method of the above wireless communication device comprising the steps of i) and ii) wherein these steps are repeated based on whether a change occurs in a number of slaves connected to a piconet of the master, as substantially described and connected to independent claim 5. Finally, the prior art of record fails to clearly teach or fairly suggest the above controlling method of the wireless communication device, wherein the sleep period is calculated by multiplying the predetermined time slot to a doubled number of other slaves connected to the master, by using connection state information received from the master, as substantially described and connected to independent claim 6.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the
